

# MACHINERY

## WE MOVE THE MACHINERY THAT KEEPS BUSINESS MOVING

Handling machinery takes special care. Each load is different, requiring proper strapping, tarping and transit to prevent damage. We've moved everything from 100,000-lb oil pumps to small man lifts, giving us the experience to handle your high-value equipment and protect it in transit.

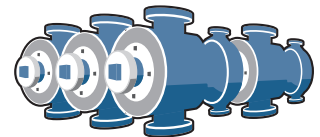

### Why IDI is the company you want to work with

IDI has been moving machinery of all types since we started our business over 30 years ago. Our teams understand what it takes to move machinery shipments both large and small, and are comfortable with all types of machinery moves including LTL, truckload and over-dimensional shipments.

We know that many moves will require riggers at the final destination and we understand what it takes to coordinate our shippers, consignees and riggers to get the equipment to where it needs to be.

### What we have to offer you

We move machinery of all shapes and sizes for our customers, and we can do the same for you. Our contacts and experience make the process easier than you might be used to when shipping your valuable equipment.

IDI has handled many machinery products including:

- Conveyors
- Pumps  
(oil, gas, natural gas)
- Aerial lifts
- Boom lifts
- Scissor lifts
- Telehandlers
- Robotic
- Paving screeds
- Commercial pavers
- Recycling machinery
- Air handling equipment
